There are two kinds of people in the world. The 1st Type wants to be left alone while the 2nd Type will NEVER leave you alone.

The Insane Are Running The Asylum (Part III)

In Part III of our 6th Newsletter, we are going to explore topics that are unimaginable even by today's standards. One needs to ask a simple question: Just how can insane people run the world - while the majority of the world population sit back and do nothing? Over the past 14 months the world population are passengers on a freight train, which has only one destination - their demise. Let's board that freight train and look at its ultimate destination.

Step 2: The Destruction Of Faith

What is Faith? There are two basic types of faith: 1) **Confidence or trust in a person, thing or concept**; and 2) **Belief in a God or in Doctrines or Teachings of a specific Religion**. Let's explore the 2nd type of faith before we revert back to the 1st type. There are 9 types of religions in the world: Christianity (31%); Islam (24%); No religion (16%); Hinduism (15%); Buddhism (6%); Folk religions (5%); Other religions (0.51%); Sikhism (0.29%); and Judaism (0.2%). What have all nine got in common with each other? They were all created by human beings sometime or other when we first sprouted from this Earth, alongside the plant and animal kingdom. How has this 2nd type of faith benefited human beings? All nine of them in their histories have caused goodness, evil and death with each one proclaiming they are better than the other.

Is This Your God?

If we go back to the slogan at the top of this newsletter i.e., "there are only two kinds of people in the world, the 1st type and the 2nd type", it is undeniable that all nine religions because they were created by human beings, have both these two kinds of people embed within them. You cannot have good without evil. But if we take just three values from all nine religions: **a) Respect one another and oneself**; **b) be kind to one another**; and **c) help one another**, we can disregard every single problem that all nine religions have embed within them over the millennia. Simply put: we need to have confidence and trust in ourselves and each other.

Because the 2nd type of person has infiltrated all nine religions over history - human beings have lost their faith in themselves and one another. We only need to find our way back to these three basic values, then we can all come together. The 2nd type person has no emotion, no feeling and no empathy on any level and they wish to reflect their insane behaviour upon the rest of society because otherwise they would have no one to admire their insanity. If you go along with insane behaviour, you become insane yourself. Now decide which kind of person you are and start today befriending those who have the same healthy values as you have, otherwise the 2nd type will find you.

Step 3: The Destruction of Technology

There is an amazing debate between Peter Thiel and Marc Andreessen that occurred in 2013, over 8 years ago. The debate centered on how technology has remained unchanged since the 1970's and Peter Thiel provides a huge amount of evidence to support this narrative. While the world thinks innovation has occurred, the facts paint a different picture altogether.

But what is very certain is that the technologies that ARE indeed changing the world - do NOT make the mainstream news headlines. People are kept in the dark deliberately, so as they never figure what is really going on behind the curtain. Let's see what has been happening behind that curtain.

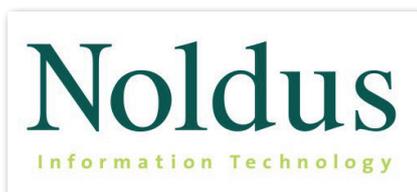

Has Technology Changed The World?

What is Magnetogenetics?

As of 20th May 2021, if you perform a wikipedia search on the technology called "Magnetogenetics", you will get just a few paragraphs of information about it. What if this technology was really going to change the world and yet the public know NOTHING about it? Because the technology is biological in nature, we need to keep the terminology simple so as its basic concepts can be understood by the general population, so let's explore.

"Magnetogenetics refers to a biological technique that involves the use of magnetic fields to remotely control cell activity". This basically means lab technicians have been trying to magnetize animal and human tissue cells. Once magnetized, these cells can then be controlled. As with all biological inventions, its benefits to humans are presented in the foreground, while their horrific destructive behaviour is hidden in the background.

Is This Your God?

'Toxoplasma Gondii Parasite'

At the forefront of this technology is a company called Noldus. They've been busy as a bee playing God working on this horrific technology ([Click Here](#)), along with these people ([Click Here](#)) and these people ([Click Here](#)) to name a few. The part that they forget to make public in the media is that the host that infiltrates the animal or human cell is actually a genetically modified organism i.e., a PARASITE called "Toxoplasma Gondii Parasite". While many may think this is science fiction, what the public doesn't know is that Shengjia Zhang filed a patent for the technology ([Click Here](#)), after they managed to replicate the theory in a laboratory over 6 years ago, a process of which you can see by ([Clicking Here](#)). The technology wishes to introduce the parasite into the brain and central nervous system and through a magnetic field control the human brain and their behaviour. So God gives us the freedom to have choice while lab technicians wish to remove that choice. The next question to be asked is - where are we NOW going to find this parasite?

What's Inside The Face Mask & Covid Vaccines?

Over the past few months, there have been many reports of moving parasitic worms being found within face masks put under a 1600x microscope. Questions need to be answered on whether these moving worms respond to a magnetic field, just as indicated within the research published in the links referenced above. If these worms are indeed magnetic and make their way to the brain and central nervous system of the person who is wearing the face mask, can a magnetic field whether it be local, national or international - control the behaviour of that individual?

Over the past two months there has been widespread evidence published, on how the Covid injection sites of the vaccinated appear to attract magnets of all shapes and sizes. Why is the injection site magnetic? Has the parasite been injected into the person hence its magnetic properties and can a magnetic field control the behaviour of every person who has been vaccinated? Questions....
